

A one-stop experience for residents to access multiple government services

Impact at a Glance

- \$65M in services available on CiviForm
- \$35M distributed
- 50K residents reached

What is CiviForm?

Named one of TIME’s Best Inventions of 2025, **CiviForm** is a collaboratively developed web application that simplifies the process of administering and applying to public assistance programs.

How it works

No-wrong-door discovery. Residents can quickly discover and apply for eligible programs in one place.

Unified, accessible and accurate applications. Residents can enter information once, and easily reuse it for multiple applications.

Simple form creation and data integrity. Government IT teams and program administrators can build, launch, and scale new programs with a no-code tool, all while ensuring data security within the walls of each government.

Community support. Community-Based Organizations (CBOs) and other trusted intermediaries can use a dedicated interface to help residents apply to programs.
